Global Medical Academy

Squads Abroad is excited to introduce the Global Medical Academy (GMA), an immersive 9-day medical experience in under-resourced communities in Belize, Guatemala, and Panama. This program offers students a unique opportunity to gain hands-on experience in the healthcare field among a cohort of like-minded peers.

Participants will develop a valuable set of skills, including patient triage, vital sign monitoring, physician shadowing, and exposure to pharmacy operations. Through their hard work, students will play a pivotal role in a globally recognized nonprofit organization dedicated to improving global health.

What to expect

Squads Abroad will organize all food, lodging, transportation, and logistics during the GMA.

Students will be greeted at the airport and prepared for community visits by our team.

Who can join

GMA is open to all qualified students entering their junior or senior year of high school.

Students must be CPR/First Aid certified and have a teacher reference to verify previous medical experience.

Students must travel with a faculty member, in groups of 3 or more.
